Cybersecurity Maturity Model Certification (CMMC) compliance becomes a requirement for contractors with the US Department of Defense on December 16, 2024. Companies that fail to comply with CMMC requirements risk not only losing their contracts but the potential of legal action.

SABRkey™ is a CMMC 2.0-compliant virtual desktop providing a no hassle and cost effective CMMC 2.0 certification, training, and infrastructure solution.

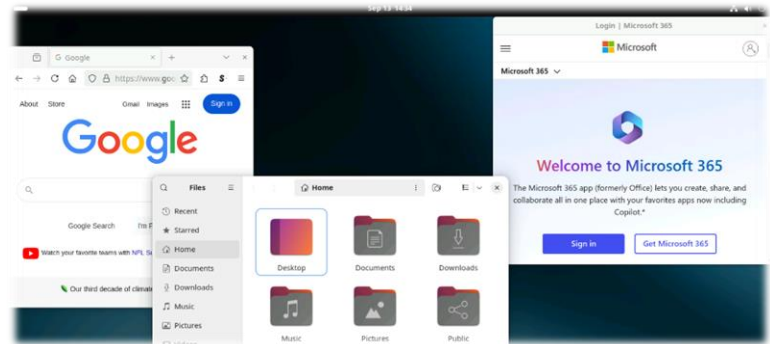

We understand the federal requirements and your business needs

Rather than reengineer your IT infrastructure to meet the new federal requirements, we engineered SABRkey™ to meet these requirements and work with your existing infrastructure.

Intuitive user interface

SABRkey™ provides a virtual desktop that creates a familiar environment and can incorporate all of the tools and applications employees need. There is no need to worry about whether an application is secured or not – if it is in SABRkey™, it is secure.

Turnkey Compliance

SABRkey™ satisfies all of the federal regulatory requirements to do business with the Department of Defense and provides a CMMC 2.0 certification. Additionally, Beskar provides access to approved learning modules to ensure system users are meeting federal training requirements.

Lower Cost and Less Risk

SABRkey™ is an affordable, subscription-based technology and compliance solution. We handle all of the CMMC system certifications and requirements so your business is always compliant. We do what we do best so you can focus on what you do best.

Available on Any Device

The SABRkey™ environment can be run anywhere, including on personal devices, while ensuring data remains secure. Remote workers and BYOD policies are easily incorporated providing worker and workplace flexibility while maintaining data security.
